STATEC

STATEC.lu

@ GovTech Lab

WiFi

SSID: GouvNet
Pass: GouvNet!

Venue **Logistics**

Toilets are on the corridor outside the conference room

Please stay inside the conference room

Keep hold of your **own cups** please

Please don’t **leave your laptops or other valuable** items in the conference room overnight

Opening hours:

Wednesday
9:00 am / 6:00 pm

Thursday
8:00 am / 7:00 pm

Friday
8:00 am / 2:30 pm

Coaching Session : Pitch preparation

- Each team can register for **ONE coaching session** with our coach Benoit
- The session helps you to prepare an **impactful pitch** and to work on your **presentation skills**
- 20 min per session, starting on **Thursday at 1 pm to 4.40 pm**
- Register by filling out the sheet in the entrance of the conference room

Code of **conduct**

- We are dedicated to providing a **harassment-free experience** for everyone
- Participants violating these rules may be **expelled** from the event at our discretion
- Everyone must treat each other with **respect, act professionally and treat the facilities with proper care**
- Should you have any issue, please contact one of the organizers

Agenda @Gouvtechlab

DAY 1
14 oct. 2026

9:00 / 9:30 pm
Arrival of participants

9:30 / 10:30 pm
Presentation
of data sets

10:30 / 12:00 pm
Hacking

12:00 / 14:00 pm
Lunch & Networking cocktail

14:00 / 18:00 pm
Hacking

DAY 2
15 oct. 2026

8:00 / 9:00 am
Arrival of participants

9:00 / 12:00 pm
Hacking

12:00 / 1:00 pm
Lunch

1:00 / 7:00 pm
Hacking & pitching
preparation

DAY 2
16 oct. 2026

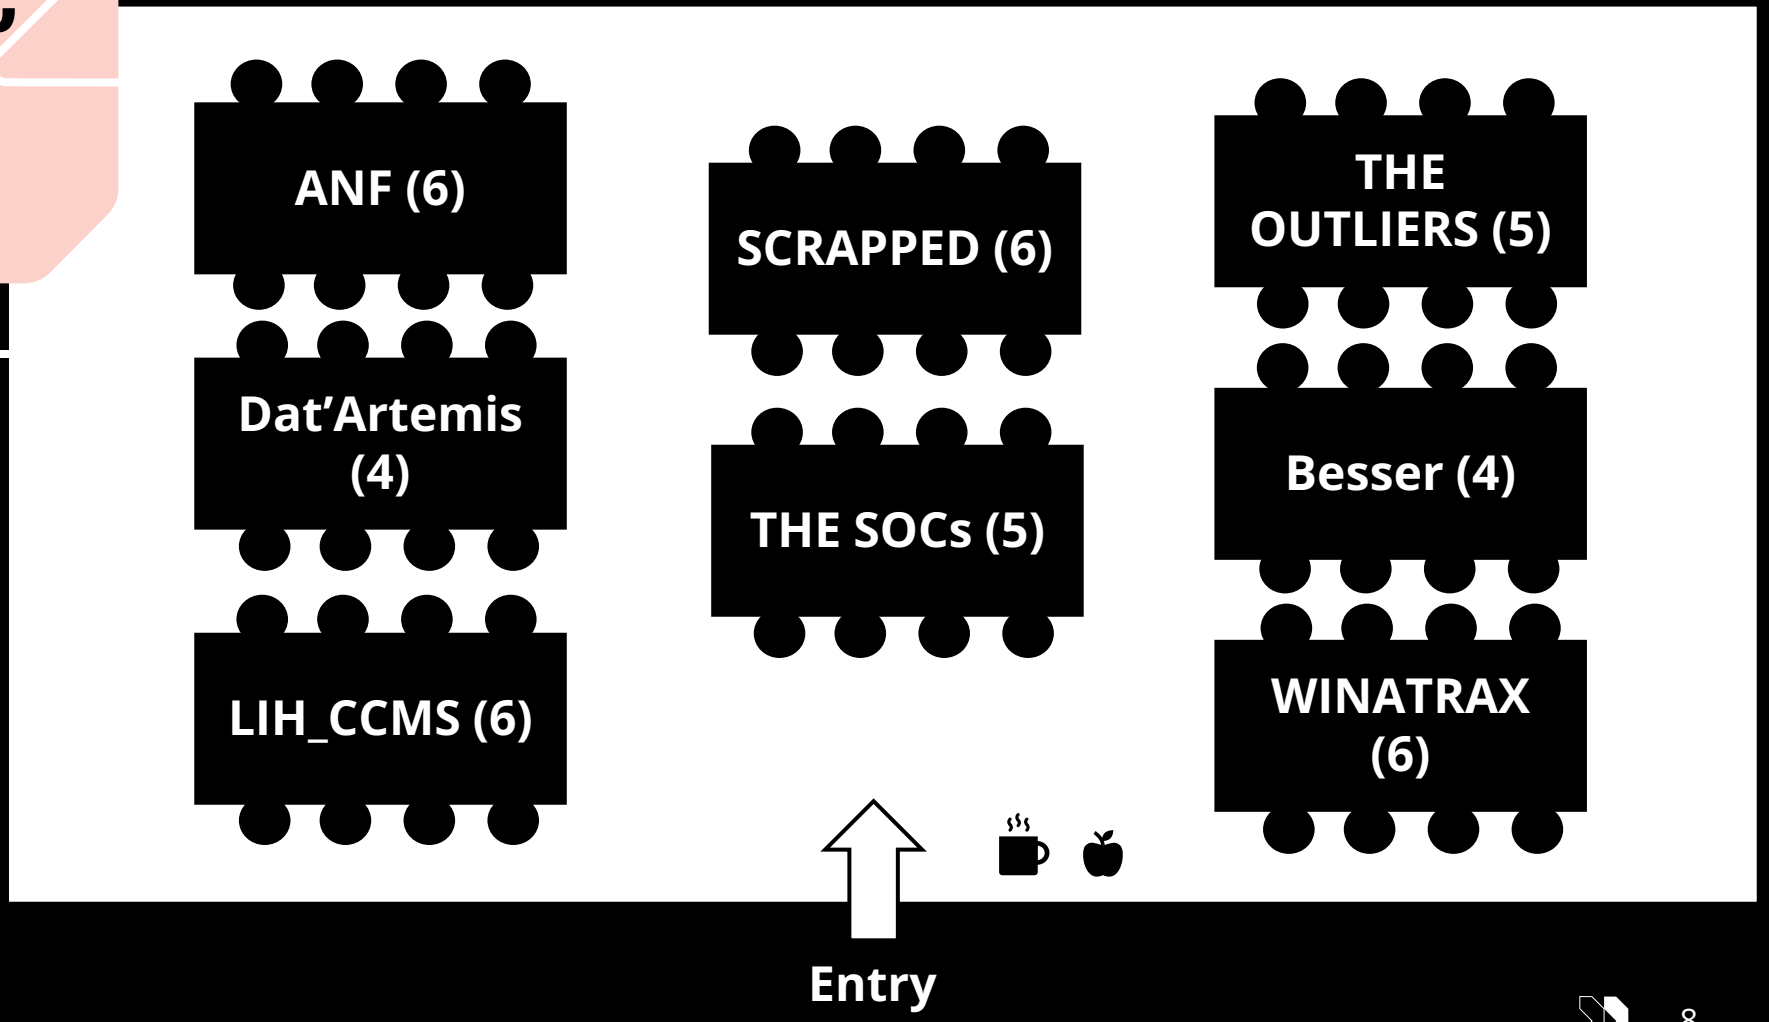

8:00 / 9:00 am
Arrival of participants

9:00 / 10:30 pm
Hacking & pitching
preparation

10:30 / 12:30 pm
Pitching sessions

12:30 / 14:30 pm
Networking cocktail
& announcement of
the winners

Conference room

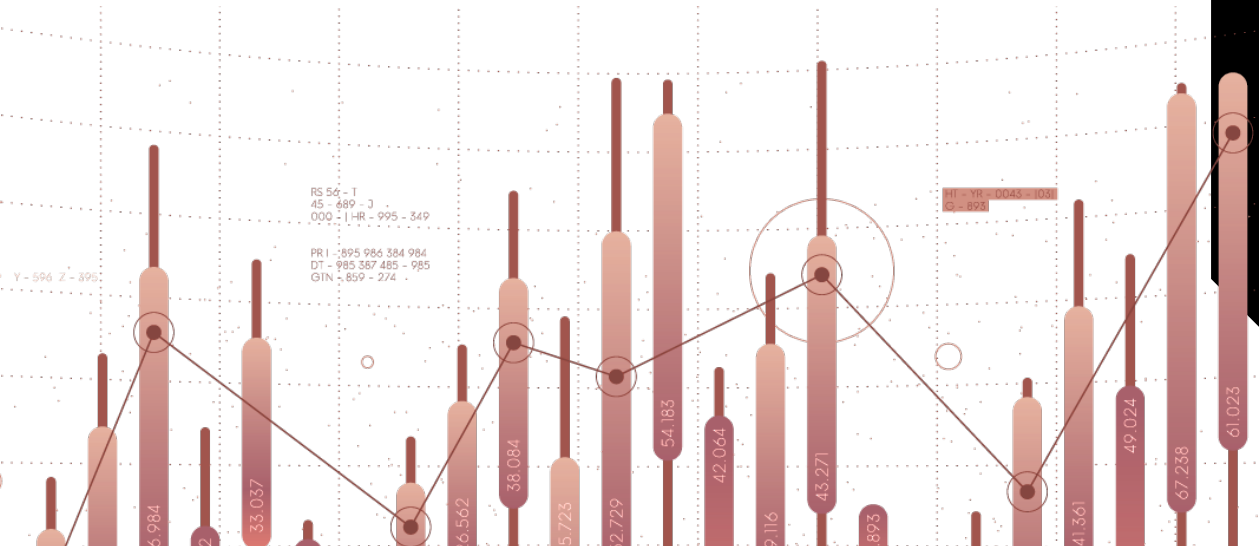

Organisation & seating

- You will find the **name of your group on the desk** that is assigned to you
- **Coaching sessions** will be hosted at the **GovTech Lab**

Heading to the future

An opportunity for STATEC
to reinvent itself, to grow,
to innovate, and to inspire a new
collective momentum.

For us, **data are not just numbers**, but essential levers for understanding and action.

STATEC aims to evolve into a **leading data engineering institute**, capable of shedding light on major economic, social, and environmental challenges.

STATEC HACKATON

Pitching
Session
10:30 pm

- **5-minute**
  pitch
  per team

Journée de la Statistique

↘

20 oct. 2025

11:00 / 12:00 am

The winners of the STATEC Hackathon will present their project on 20. October at the Journée de la Statistique, attende by Tom Haas, Director of STATEC and Lex Delles, Minister for the Economy

12:00 / 02:00 pm

Networking cocktail

Jury

Claude Lamboray
Head of Unit
Innovation
Data Lab

Leila Deshayes
Head of Unit
Data Centralisation
Data Lab

Olivier Thunus
Head of Department
Macroeconomic statistics

Luc Roettgers
Head of Department
Information technology

Bastien Larue
Head of Department
Economic conditions, modelling, forecasting

François Peltier
Data access and Data protection

Johann Neumayr
External Relations

Delia Controguerra
Head of Unit
Communication

Luxembourg's external trade data

The goal is to provide the most effective representation of

Luxembourg's external trade data.

Participants should develop **visualization methods and tools** (static and/or interactive) capable of addressing questions such as:

- **Who are Luxembourg's main trading partners ?** (exports and imports)? How have they evolved over time?
- **What are the main categories of goods exported from and imported into Luxembourg ?** How have these patterns changed over time?
- **For a given product category, who are Luxembourg's principal trading partners** (exports and imports)?
- **For a given partner country, what are the main goods traded with Luxembourg?** (using 2-digit product codes) How can increasingly detailed levels of information (up to 8-digit product codes) be displayed while highlighting only the most significant trade flows?

The goal is to provide the most effective representation of

Luxembourg's external trade data.

Participants should develop **visualization methods and tools** (static and/or interactive) capable of addressing questions such as:

- **Luxembourg's trade compared with that of other countries?**
- **Do Luxembourg's trade flows exhibit specific seasonal patterns**, either overall or for particular product categories? How can their evolution best be visualized while filtering out purely seasonal effects?

Any other element that you consider relevant may be incorporated into your work

Eurostat

Eurostat is the is the statistical office of the European Union. Eurostat disseminates European Statistics produced by the European Statistical System, including from STATEC. The data enable comparisons both among European countries and between individual countries and European aggregates. The data can be accessed in a dedicated database.

The participants should select the data for the challenge from the

Eurostat Dataset on EU Trade

[ds-045409] EU trade since 1988 by HS2-4-6 and CN8

Deliverables

- **Pitch deck**
  Idea
  Approach (tools, methodology…)
  Mini demo

- **Reproducible artifacts**
  Jupyter notebook,
  scripts/app +
  requirements.txt/environment.yml,
  licensing,
  Readme…

Transmission :

Can be stored on a public GIT repository. A link needs to be shared at the end of the hackathon at

or

A data transmission request can be sent by STATEC to the group if preferred

Key considerations :

- The focus shall be put on Luxembourg.
- The result shall include a temporal dimension, comparing different points in time.
- The result shall include a geospatial dimension, for example by comparing Luxembourg with other countries.

Evaluation criteria

When developing the result, the following criteria should be kept in mind:

Use of Data
How effectively does the result use and analyze date to create new insights ?

Innovation & Experimentation
To what extend does the project demonstrate creativity, innovation and innovation ?

Functional Proof of Concept (PoC)
How complete and successfully does the result work and demonstrate its intended value ?

Reproducibility & Openness
Can the project be easily reproduced and is shared in an open and transparent manner (e.g. license, method, code, documentation) ?

Clarity and Quality of the Presentation
How clear, well-structured, and well-timed was the presentation?

ANY QUESTIONS ?

General Licensing Terms – STATEC Hackathon

1. **Intellectual Property**

   Each team **retains ownership** of its code, models, and deliverables.

   By participating, the team **grants STATEC** a **non-exclusive, worldwide, royalty-free, perpetual license** to **use, reproduce, display, evaluate, and publicly present** the project (demos, slides, videos, website), including after the event.

2. **Source Code License**

   Submitted code must include an **open-source license** with an SPDX identifier in the repo (e.g., a LICENSE file).

   Recommended licenses: **EUPL-1.2** (preferred for EU public sector), **Apache-2.0**, or **MIT**.

   Teams ensure **third-party dependencies** respect their licenses and are **compatible** with the chosen license (beware strong copyleft constraints).

3. **Data**

   No personal or confidential data may be stored in repositories or exported from secure environments.

   External open data must **keep its original license** (cite sources and license in the "Data Card").

   Deliverables should contain only **non-sensitive samples** and **approved aggregated results**.

4. **Models/Weights and AI-Generated Content**

   Model weights and trained artifacts follow the **same license** as the code, unless explicitly stated otherwise in the repository.

   Teams are responsible for **rights compliance** on prompts, training data, base models, and any generated text/images.

5. **Brand and Communications**

   Use of **STATEC name, logo, and visual identity** is limited to hackathon materials provided/approved by STATEC.

   STATEC may **record/photograph** the event and publish project excerpts; participants consent to appearing in such materials.

6. **Security, Compliance, and Ethics**

   Compliance with **applicable laws** (data protection, IP, cybersecurity) and **access rules** for technical environments is required.

   Prohibited: extraction of personal data, security bypass, illegal or discriminatory content.

7. **Warranties and Liability**

   Deliverables are provided **"as is."** Each team warrants it has the rights to use and license what it submits.

   STATEC is not liable for damages arising from the use of deliverables.

8. **Governing Law**

   Luxembourg law; competent courts in Luxembourg.
